

**2000 CORPORATE SERVICES AND
ECONOMIC DEVELOPMENT COMMITTEE BUDGET REVIEW**

COMMITTEE RECOMMENDATIONS AS AMENDED

That Council approve the 2000 Draft Operating Estimates and the 2000 Draft Capital Estimates & 10-Year Capital Forecast for the Corporate Services and Economic Development Committee, as presented or as amended by the following Motions:

1. The 2000 Mississippi Valley Conservation Authority Budget in the amount of **\$313,328, page 166 , as mandated under the statutory levy requirement;**

The 2000 Rideau Valley Conservation Authority Budget in the amount of **\$1,295,650, page 166, as mandated under the statutory levy requirement;**

The 2000 South Nation Conservation Authority Budget in the amount of **\$427,815, page 166, as mandated under the statutory levy requirement.**

2. **That the Regional Finance and Health Departments evaluate and investigate the issue of one-time and ongoing hospital restructuring costs and the impact on the charitable sector;**

And that staff prepare a report outlining potential ways to address this issue, including (but not limited to):

- **Provincial grants to cover the full costs of provincially ordered hospital restructuring, and failing that**
- **reserve funds;**
- **dedicated levy;**
- **restructuring savings;**
- **debenture; and**
- **any other options available.**

- 3. That the Chief Administrative Officer find a source to provide a \$10,000 purchase of service contract for the Woods Manufacturing Company Brass Band.**

- 4. That an amount of \$2 million be added to the corporate budget (Finance - Sundry and Remissions - CSEDC Operating Book page 133) for the provision of the Transition Team, subject to staff comments to be provided at the Council budget review meeting on 22 December 1999.**

DOCUMENTATION

1. 2000 Budget Directions report dated 01 December 1999 previously distributed.
2. 2000 Draft Estimates - Executive Summary of Expenditure and Taxation Requirements, 2000 Draft Operating Estimates, and 2000 Draft Capital Estimates and 10-Year Capital Forecast Documents previously distributed.
3. Additional documentation provided by the Ottawa Centre for Research and Innovation dated 13 December 1999 is immediately attached as Annex A.
4. Capital Project Information for Planning and Development Approvals - Lansdowne Park Retrofit - Project Number 900501- budget page immediately follows the above documentation and is identified as Annex B (*Additional page to the 2000 Draft Capital Estimates Budget Book*).
5. Extract of Draft Minute, Corporate Services and Economic Development Committee, 13 December 1999, immediately follows the above documentation and includes a record of all votes.

OTTAWA CENTRE FOR RESEARCH AND INNOVATION

Submission to

CORPORATE SERVICES AND ECONOMIC DEVELOPMENT COMMITTEE

December 13, 1999

OCRI - The Catalyst

ATOP (Access To Opportunities Program)

Success - OCRI enabled a coordinated approach on behalf of Ottawa's 4 post-secondary institutions to mount a campaign to raise the \$28 million to be matched by the Ontario government. All other Ontario institutions mounted an individual campaign. The goal was to "double the pipeline" of students in specific academic programs with strategic interest to high technology companies. \$55 million was raised.

Challenge - The current issue is to maintain the growth as well as the quality of students into these programs. There is also a large increase in the demand for co-op placements for these additional students.

Opportunity - A number of new partnerships were created during the campaign. These new relationships can deliver large value to the institutions and the community if they are nurtured.

National Capital Institute of Telecommunications (NCIT)

Success - NCIT was initiated through the OCRI Research Management Board. Following funding from the Canadian Foundation for Innovation, NCIT now has staff and a Board of Directors. A new building which will house one of the 4 campuses of the NCIT will open in early 2000 at the Communications Research Centre.

Challenge/Opportunity - OCRI has no ongoing role with NCIT other than representing the Region of Ottawa-Carleton on the NCIT Board of Directors.

OCRI Tech Coaches

Success - This \$1 million program delivers high value training for elementary and secondary school teachers in Ottawa-Carleton in the effective use of technology in the classroom. Without OCRI this program would never have come to Ottawa.

Challenge - Sustaining the support in the face of cuts to education is an ongoing challenge. Creative ways for coaches to add value are constantly being explored and developed. Optimizing the expertise of the 34 coaches through diverse strategies requires dedicated effort.

Opportunity - Because of the OCRI Tech Coaches Program Ottawa attracts a large number of pilot projects with corporate investment in education. This is a key strategy for developing the future talent pool of technology workers as well as providing an enriched technology environment in education, which helps attract employees to the region.

Partners for Jobs

Success - OCRI provides strong leadership for this Region-led initiative to assist un- and under-employed adults in securing meaningful, full-time employment. OCRI chairs an action team which links organizations and businesses which have not previously worked together. OCRI is an active member of 2 additional teams. OCRI's wide-ranging contacts and past

success in managing broad community collaboration have been extremely useful in organizing and supporting all the Partners for Jobs teams.

Challenge - The diversity of team members and the difficult task of "myth-busting" requires sustained and focused support for a collaborative approach. (*causes of unemployment, roles and responsibilities),

Opportunity - The concept of creating a homegrown solution has been championed by a number of community leaders such as John Kelly. This awareness-raising and OCRI's involvement in advisory committees across many sectors allows us to bring additional partners to the table.

Re-Engineers

Success - OCRI has secured \$126 thousand from the Ontario government to develop and implement a program to upgrade the skills of un- and under-employed landed immigrants with computer science and electrical engineering degrees to facilitate their entry into the workplace. Corporate support is strong. The goal is to have approximately 100 people employed annually in the advanced technology sector through this program. This will free up lower-skilled positions for others who are now unemployed.

Challenge - Creating a sustainable business model that is not dependent on government money for ongoing operations is key. OCRI is currently working with local employers to ensure that they support this program conceptually and financially.

Opportunity - OCRI can stimulate the economy on a number of fronts: assisting local employers with hiring high tech recruits; assisting Regional government in reducing welfare roles; and increasing business for local training providers by acting as a broker of services for Re-Engineers candidates.

School Breakfast Program

Success - OCRI has led this community partnership for 10 years. Funders repeatedly tell us that the breadth of community support is one of the main reasons they continue to provide money. 3800 of the Region's neediest students are fed daily in 68 area schools. OCRI is able to leverage the Region's annual investment of \$62,500 to bring an additional \$437,500 in funds to the program.

Challenge - As government budgets are reduced, each partner's contribution is at risk.

Opportunity - Maintaining a community partnership model will allow pooling of resources so that no one funder is responsible for the full program costs. OCRI's contribution is neutral management of the partnership.

Volunteers in Education

Success - 670 volunteers provide support for learning in 175 area schools as a result of OCRI's program to serve the entire community. Early Literacy training for young students is an important part of this program. In 1998-1999 over 68,000 hours were volunteered,

adding approximately \$1.4 million dollars of in-kind work to the local economy. This support is leveraged from \$100 thousand secured from a variety of sources.

Challenge - The success of the Volunteers program has resulted in a doubling of demand each year of operation since 1994. Securing funds to meet this demand is an ongoing challenge.

Opportunity - An increasing number of early retirees, particularly those with science and technology backgrounds, is occurring at the same time as the schools are identifying specialized areas for volunteering in schools. For example, requests for technical support and after-school math tutors are becoming more common. OCRI is working to expand the program to take advantage of this emerging supply and demand.

SmartCapital

Success - 22 projects, many the result of the Ottawa Community Network (OCN), are the rich centre of activity of Ottawa's SmartCapital program. Many partners and representatives from various stakeholder groups in the community are actively involved. SmartCapital is one of 5 Ontario projects proceeding to the final stage for the federal Smart Communities funding.

Since 1997 ROC has invested \$237 thousand dollars in OCRI for OCN and SmartCapital. That investment has leveraged \$2.5 million:

- Teletourism project \$1.5 million
- Digital Platform \$800 thousand
- Technology Enhanced Community Services \$125 thousand
- webcasting \$100 thousand)

Challenge - Sustaining development of the SmartCapital program requires financial support. Without a core team to leverage partnership development and broker contributions progress will be significantly constrained.

Opportunity - The time is right to support and enable large changes in a restructured municipal government, as well as newly restructured school boards and hospitals through information and communications technologies. The future prosperity of the region will be determined largely by our capacity to optimize the rich environment of community infrastructure (e.g. OCRI and other community agencies) and the highly successful technology development community in Ottawa-Carleton.

Webcasting

Success - In collaboration with Louis Shallal, Executive-Director of IT for the Region, OCRI has delivered two community consultation webcasts. The first concerned the Hawthorne-Conroy Road construction site. Members of the public were able to see and hear directly from project managers and elected representatives through an audio video stream integrated into a ROC web page. The webcast was then archived and available online for further access. 175 residents were online to hear the live presentation and hundreds more have accessed the archived version.

The second webcast concerned the Y2K readiness project. Once again, residents could hear from staff experts on Y2K and submit questions directly from their homes or desktops. Participation was very high with questions and answers flowing for over half an hour.

Challenge - OCRI is able to deliver high quality webcasting services to public sector organizations at an affordable price. Commercial costs for this service would be prohibitive at this time.

Opportunity - Further collaboration with the Region on webcasting includes providing information to regional staff on how to implement webcasting through ROC, LAN to the desktops of all regional employees, for internal use. OCRI aspires to continue providing webcasting services for public consultation and communications events as developed by regional staff.

- 1 The 1999 forecast has been updated to reflect actual results to November 30 and forecast for the month of December
- 2 The 2000 Project budget amount has been increased by \$ 1,500,000. The details of which are Digital Platform \$ 400,000, Smart Capital \$ 500,000, Leadership Academy \$ 200,000 Leadership on Line \$ 200,000, and Grass Roots \$ 200,000..
- 3 The 1998 amount includes two large non recurring events, VTC 98' \$ 850,000 and AMTA 98' \$ 230,000.

Region of Ottawa-Carleton

PROJECT INFORMATION

DEPARTMENT	PLANNING AND DEVELOPMENT APPROVALS
PROJECT NAME	LANSDOWNE PARK RETROFIT
PROJECT NUMBER	900501

SCOPE AND JUSTIFICATION

Lansdowne Park will be transferred to the Region effective January 1, 2000. Under the Transfer Agreement the City of Ottawa is to pay to the Region the sum of \$675,000 annually commencing on January 1, 2000, for a period of 15 years. These payments are designed to address deferred maintenance items incurred as a result of the uncertainty of the future of Lansdowne Park in recent years. Revenue opportunities created particularly in the Stadium as a result of improvements will offset some of the capital costs. These payments form the basis to finance capital improvements at the Park.

In order to respond to these requirements we have reviewed the City's deferred maintenance and capital requirements as well as reviewing the building conditions. Priority has been given to those projects which will have beneficial impacts on the revenue potential (e.g., turf replacement, stadium refurbishment, and asphalt repair) in preparation for the Francophonie Games in 2001. As well, structural and concrete repairs to the stadium, Civic Centre and Aberdeen Pavilion are required along with roof, foundation, glazing and assorted works. A small portion of the funds are identified to address deficiencies in the remaining facilities.

COMMITMENTS

Regional Council approved the transfer which takes effect on January 1, 2000.

IMPACT ON OPERATIONS

Extend the life of physical assets, improve efficiency of operation and provide increased safety to staff and public. Failure to perform the work will result in significant degradation of the assets.

INTRODUCTION

J. LeBelle, Finance Commissioner, reviewed the key limitations facing Council in the development of the 2000 budget. Referencing the Provincial announcement of new funds in the health and ambulance areas, Mr. LeBelle stated the Minister's intention was that in a two tier system of government, that the upper tier must reduce the tax requirement to accommodate the method the Province chose to finance the new money. Therefore, in 2000, Council was required to reduce the tax requirement to provide a tax rate which created the necessary tax room across the Region to accommodate the lost of the CRF funding. In addition, Mr. LeBelle stated there were a number of items that must be accommodated as a first charge against the 2000 budget.

The Finance Commissioner explained to accomplish the competing objectives, it was necessary to issue instructions to the departments regarding the development of the budget = 2000 Budget Directions report.

2000 DRAFT OPERATING ESTIMATES - EXTERNAL AGENCIES

CONSERVATION AUTHORITIES

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 163-167

Mr. LeBelle confirmed the amounts shown on page 167 of the draft estimates needed to be adjusted upward as reflected on page 166. He reminded Committee funding to the conservation authorities was a statutory requirement (levies), and not to be considered as grants. Therefore, Committee approved the amounts required and outlined on page 166, representing a total increase of \$41,000 combined.

Moved by R. van den Ham

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Mississippi Valley Conservation Authority Budget in the amount of \$313,328, page 166, as mandated under the statutory levy requirement.

CARRIED
(B. Hill dissented)

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Rideau Valley Conservation Authority Budget in the amount of \$1,295,650, page 166, as mandated under the statutory levy requirement.

CARRIED
(B. Hill dissented)

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 South Nation Conservation Authority Budget in the amount of \$427,815, page 166, as mandated under the statutory levy requirement.

CARRIED
(B. Hill dissented)

Draft Budget Minute

13 December 1999

OTTAWA ECONOMIC DEVELOPMENT CORPORATION (OEDC)

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 170 - 173

Dr. Brian Barge, President and Mr. Franklin Holtforster, Chair, OEDC, addressed the Committee. They expressed their appreciation for the ongoing support from Committee and Council. (Written submission on file with the Committee Co-ordinator.)

Councillor Meilleur inquired about the effectiveness of The Ottawa Partnership (TOP) organization. As a member of the business community and Chair of OEDC, Mr. Holtforster referenced the collective success of bringing together a common desire to identify the principle economic generators and provide long term focus to the economic development effort. He stated it was appropriate to ensure money was well spent and properly targeted. Dr. Barge offered OEDC's support and enthusiasm for TOP, referencing benefits to planning, cooperation, objectives, and greater leverage.

Councillor Hill expressed concern regarding an article in the Citizen that stated Ottawa-Carleton was still not known in the global market. Mr. Holtforster explained he was not aware of the article. However, he reviewed the marketing strategies used by OEDC and the targeted areas, pointing out the desire to not waste money on efforts that would not yield success. Councillor Hill expressed disappointment with the article and the impression it conveyed. Dr. Barge added that OEDC's marketing approaches had been focused. He explained the scenario around the information technology sector in Korea and Taiwan and their overwhelming knowledge and experience with Ottawa. Dr. Barge acknowledged there may be places in the world Ottawa was not well known, however, their attentions are focused where there is greatest potential on the investment.

Chair Chiarelli reported the strategic economic development plan should be finalized in Spring 2000 and would deal with marketing strategies as well.

Councillor McGoldrick-Larsen commented the community was fortunate to have a strong economy and growth in Ottawa-Carleton. However, the Councillor indicated this triggered transportation demands with many of these needs not being met.

Councillor McGoldrick-Larsen referenced a previous inquiry regarding whether the Region would be able to respond to the projected economic development expansion in relation to funding the corresponding transportation needs. M. Sheflin, Environment and Transportation Commissioner, stated unless there was access to additional funding or a continued source of revenue, it would not be sustainable. However, he referenced efforts for user pay options and a possible infrastructure program, and expressed his optimism.

Draft Budget Minute

13 December 1999

Councillor McGoldrick-Larsen thanked the Commissioner for his response. However, she pointed out at a recent OEDC event, traffic congestion was listed as a main concern for further economic growth in Ottawa-Carleton.

Councillor Loney believed more funding was required for economic development. He hoped additional options may be available through the pending restructuring and pooling of all resources. Further to earlier comments provided by Dr. Barge, Councillor Loney stated OEDC was producing excellent results in marketing in Korea and other potential areas.

Chair Chiarelli explained the Transition Board would have to review the many levels of existing economic development entities. The Chair suggested the business community should put attention and resources into planning on how they believe the restructuring should take place. He stated it was important they review the opportunities to merge and identify mandates in the context of a one city scenario, and provide their input to the Transition Board as early as possible.

In closing, Chair Chiarelli complimented the agencies for another successful year.

Moved by A. Loney

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Ottawa Economic Development Corporation Budget in the amount of \$1,682,000, page 173, as presented.

Draft Budget Minute

13 December 1999

OTTAWA CENTRE FOR RESEARCH AND INNOVATION (OCRI)

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 182 - 187

Mr. Bill Collins, Executive Director, acknowledged that the development of the strategic economic development plan may re-position the responsibilities of the various agencies. However, he stated the level of activities currently handled by OCRI required additional funds in order to effectively lever additional revenues from other levels of government and businesses. Mr. Collins referenced written documentation dated 13 December and presented to the Committee (written submission on file with the Committee Co-ordinator)..

Mr. Collins reviewed a revised budget and the numerous projects, their success, challenges, and opportunities. During the review, he outlined how the institution worked as a lever for other revenues generated into the community

In closing, the speaker explained the \$600,000 request made it possible to continue to proceed at the current level. He stated less funding would result in decreased programs, thereby not generating as much revenue. Mr. Collins acknowledged the difficulties faced by the Region, however, noted the current funding was not holding up in comparison to the funds received from other sources.

Councillor Cantin referenced the increase in request and inquired where the funds were to come from. Mr. Collins acknowledged the difficulty of *both* parties regarding funding. He reiterated OCRI's growth factors and growing operating budget.

Chair Chiarelli stated the unfortunate situation where they had to acknowledge the tremendous success, results and co-operation of the economic development agencies over the past year. However, he pointed out the need to flat line all budgets for 2000.

The Chair explained the need for a fundamental review of all the economic development agencies with regard to the pending restructuring situation and recommendations yet to come from the strategic economic development plan. He suggested should a significant need arise during 2000, there *may* be the option to refer it to the Transition Board.

Moved by R. Cantin

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Ottawa Centre for Research and Innovation Budget in the amount of \$392,000, page 187, as presented.

OTTAWA LIFE SCIENCES COUNCIL (OLSC)

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 190-193

In response to a question from Councillor Meilleur, Mr. Ken Lawless, Executive Director, reported on the status of the OCHIP project and its new phase in the hospitals. He confirmed the eventual vision included connecting the pharmacies, and reviewed the phased approach and critical information gained from the hospitals.

Councillor Hume commented on the City of Ottawa attempt to eliminate half the potential for the life science technology park through the conversion to a regular business park. Mr. Lawless explained the land was owned by the Province of Ontario and they had initiated the movement towards this change, leaving the City little option. He stated the OLSC did not support this change, however, their role was to market the Park on behalf of the Province and it was technically out of their hands. Councillor Hume believed this Provincial action was shortsighted and emphasized the need to protect the facility.

Moved by P. Hume

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Ottawa Life Sciences Council Budget in the amount of \$147,000, page 193, as presented.

CARRIED

OTTAWA-CARLETON WILDLIFE CENTRE

ECONOMIC DEVELOPMENT GRANTS PROGRAM

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 208-209

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Economic Development Grants Budget in the amount of \$269,000, page 209, as presented.

CARRIED

ARTS GRANTS PROGRAM

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 212-213

Mr. Peter Honeywell, Council for the Arts in Ottawa. Mr. Honeywell reported that ten years ago the per capita spending on the arts was at \$1.25, yet the current funding represented \$1.12 per capita. Mr. Honeywell stated in the past mandate of Council, two reports (1. Task Force on Arts Report and 2. Arts Policy Report) have been prepared and support the need for an increase. The speaker requested the Committee and Council to consider at least a small increase to the arts for 2000, noting the Arts Policy set out a \$3.00 per capita for 2000.

Councillor van den Ham referenced the pending restructuring and the opportunity for positive change. He hoped the arts community would make presentations to the

Draft Budget Minute

13 December 1999

Transition Board outlining their requirements and information regarding the two reports. Councillor van den Ham stated under different circumstances he would support a small increase to the arts, however, referenced the Provincial direction regarding a reduced tax rate.

Mr. Tyrone Paterson, Opera Lyra Ottawa. Mr. Paterson reported the arts community was vibrant and exciting, in particular for Opera Lyra Ottawa as they were experiencing unprecedented growth. The speaker stated the organization had made significant progress in reducing their accumulated deficit and reviewed the variety of means to accomplish this, such as increased attendance, subscriptions, support and sponsorship. Mr. Paterson explained their objective was to move to three main stage productions. In closing, the speaker reviewed government support for other Canadian arts organizations and stated Ottawa was below this figure. He emphasized the need for support for all arts programs in that it was vital to sustain the vibrant quality of life in the community.

Councillor Meilleur applauded Opera Lyra for their recent achievements. She reported they had developed a strong partnership and sponsorship with the business community and increased their fundraising activities and educational programs. She hoped the Region would follow the trend of increasing arts support and acknowledge the economic results from this support.

Councillor Loney provided a background to the arts grants funding. He referenced the Arts Task Force and Draft Arts Policy reports that were pending Council approval. The Councillor stated the reports identify the number of areas that required additional support, however, noted the dilemma of provincial direction and downloading.

Councillor Loney reported that between this meeting and Council budget consideration, he would be reviewing the corporate budget to attempt to identify areas that could be used to increase the arts contribution. The Councillor stated it was unfortunate, but did not believe the objective of \$3.00 per capita for 2000 was possible.

With respect to the arts policy report, Councillor Loney explained it was prepared on the current structure of two tier system. However, with respect to restructuring to one city, it was necessary to realize the extra monies required were *in addition to* what is currently available at the lower tier.

Speaking to the review of the annual arts grants, Councillor Loney referenced the frustration of having to deny quality applications and the need for additional support to grow and maintain the current pace.

Draft Budget Minute

13 December 1999

In closing, Councillor Loney stated he planned to bring forward a Motion at the Council budget review, in hope to find a source without exceeding the budget directions. He reiterated the need to show faith with the arts community based on the past reductions to their budgets and the issues outlined in the arts reports.

Councillor Cantin also commented on the talent in the arts community and frustration experienced by the arts industry and jurors with the allocation of arts grants with no additional funds.

Moved by A. Loney

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Arts Grants Budget in the amount of \$841,000, page 213, as presented.

MISCELLANEOUS

HOSPITALS - CAPITAL FINANCING COSTS

Councillor Munter introduced the issue and reported the Ottawa Academy of Hospital Executives were facing a large problem regarding capital funding required for hospital restructuring.

Mr. Michel Bilodeau, President, Sisters of Charity of Ottawa, on behalf of the Ottawa Academy of Hospital Executives. Mr. Bilodeau indicated he was before the Committee on behalf of the six hospitals in Ottawa. He reported the health restructuring commission had ordered all hospitals to conduct certain renovations. Mr. Bilodeau explained he expected the total project costs to reach at least \$350M and the share the hospitals were required to pay ranged between 50-70% of the total cost; higher than \$100M. The speaker stated it was not possible to fundraise for this purpose in addition to the ongoing fundraising required for research and other purposes.

Draft Budget Minute

13 December 1999

In closing, Mr. Bilodeau reviewed the renovation and financial situation for the Sisters of Charity Hospital. He requested Committee's support to return to the former policy of funding 25% of the local share of capital costs. In addition, he asked the Committee to consider how the Region could support hospitals over the next few years in order to deal with this significant problem.

Councillor Munter acknowledged the issue and request was too large to resolve in the short budget time frame. He hoped Committee would direct staff to review the options, referencing the historical tradition to support capital projects for hospitals. Councillor Munter compared the huge effort of the United Way to raise \$15M annually. He commented this requirement was for \$100M and expressed concern with the impact this fundraising effort would have on all the other health and social service agencies the Region also supported. Councillor Munter referenced the quality of life and stated it was a tradition of local government to be a partner with the local hospitals.

Councillor Hunter did not support the parallel of the historical contribution and the current situation. He pointed out the capital costs required now were a result of a Provincial order and were being forced onto a system that never supported the hospital restructuring.

With respect to the savings to be achieved by the Province through the restructuring, Councillor Hunter believed they should be responsible for using those savings for the restructuring costs. In comparison, he referenced the pending municipal restructuring and pointed out the Province was not prepared to assist with the restructuring costs, but expected the costs to be paid out of future anticipated savings.

Councillor Meilleur agreed with Councillor Hunter in that the costs were transferred down yet the Province was the only body saving money as a result of hospital restructuring. She sympathized with the hospitals situation and challenges.

Councillor Loney referenced the huge requirement to be paid by the Thunder Bay and Sudbury communities as a result of restructuring. The Councillor stated it was a significant additional download to be added to the already difficult situation of other downloaded areas.

Councillor Loney reviewed previous community and public support during the construction of the Queensway Carleton and General Hospitals. However, he stated at that time they were new "community" hospitals and the enthusiasm was high. He believed it would be difficult to fundraise on the reality of less service and the

Draft Budget Minute

13 December 1999

restructured system. The Councillor agreed there was a need for a consorted effort to have the Province take some responsibility. In closing, he supported the proposal for staff to review the options in particular with the changes in 2001.

Councillor Hume emphasized the need to engender a public debate regarding the issue as it was very serious. He stated he did not support the restructuring of the hospitals nor did he want the fundraising efforts now required to negatively affect the fundraising for other charitable sectors. Councillor Hume emphasized the need to obtain the correct information necessary to go forward to the Province and community, such as the consequences of restricting the Region from collecting regional development charges for hospitals. Councillor Hume moved a Motion directing staff to investigate the issues discussed and options to consider to resolve this significant problem. He acknowledged it may not be Council's responsibility to provide the funding, however, it was their responsibility as leaders to develop a plan.

Chair Chiarelli expressed his empathy for the hospital sector. However, he explained the importance for the public to understand the challenges being placed on many sectors, such as the hospitals, post secondary education, social housing, infrastructure, and municipal, and how they were interconnected. The Chair referenced the intergovernmental relationship between the municipalities and the Province and Federal governments, and provided figures on the decreased funding from the Province, yet increased downloading.

Chair Chiarelli stated it was beyond the capacity of Ottawa-Carleton, or any other municipality, to deal with the mandate and financial challenges without any new sources of revenue. He emphasized the need for all sectors to come together to debate the crisis in intergovernmental relations in terms of funding.

With respect to the hospital sector, Chair Chiarelli wished he could create a fund to deal with this sector and the problem. However, he explained at the same time Council would be required to deal with other sectors and infrastructure requirements, reviewing the Provincial default on their obligation regarding the download of provincial highways.

In closing, Chair Chiarelli challenged the many sectors to communicate with one another and inform the Province it was not possible for municipalities to absorb the entire downloaded costs. He agreed with the need for the Province to invest the savings and additional economic activity into the community. The Chair informed the Committee the municipalities collectively have been demanding additional sources of revenue to assist in meeting the challenges.

Draft Budget Minute

13 December 1999

Councillor Munter acknowledged all previous comments. However, he stated the need to research the facts and numbers and to use the report as a platform to deal with some of the issues and the Province. He hoped Committee would support the Hume Motion.

Councillor Beamish noted in addition to the sectors outlined by the Chair, there would be large transitional capital costs associated with municipal restructuring. The Councillor stated staff resources would be limited as a result of the immediate needs around restructuring, that being a more direct responsibility at this time. Therefore, he could not support the Hume Motion.

Councillor Meilleur referenced the difficult position for the hospitals with regard to speaking out against the Province and the consequences on their Provincial grants.

Councillor Legendre concurred with the Chair's comments in that all sectors must come together to make their case. He suggested the total taxation situation in the Province needed to be reviewed in relation to the changes made to the service delivery.

Chair Chiarelli referenced the pending restructuring and arrival of the Transition Board. He stated the 2001 budget would be prepared by the Transition Board and recommended to the new Council. He believed that many issues would have to be considered by the Board in evolving a recommended budget for 2001. The Chair wondered if it was more appropriate to refer the Motion to the Transition Board to take into account during the creation of the 2001 budget. In closing, Chair Chiarelli questioned if staff would be available to do justice to the investigation and work required. He noted staff from all existing municipalities will be required to provide reports and research for the Transition Board regarding the many changes required.

Councillor Hunter stated the Motion would require the Province to live up to its commitment and obligation it forced on the community regarding hospital restructuring. He pointed out the Transition Board would be a Provincially appointed body, and suggested the Board would probably direct staff to complete the report in any event. Councillor Hunter expressed his disapproval regarding the powers of the un-elected Transition Board, and did not support referring the Motion to that body. Rather he believed the Region should take the lead on getting the Province to assume their responsibility around health care restructuring.

Draft Budget Minute

13 December 1999

Councillor Munter clarified the first year for possible funding for this issue was 2001. He concurred with Councillor Hunter in that it was more appropriate for the Region to conduct the research and report, noting in the long run it may be the Region's obligation in any event. He added it did not prevent submission of the report to the Transition Board at a later date.

Councillor Loney also expressed concern with involving the Transition Board at any stage. He referenced the possible vast powers the Board may have. With respect to staff resources, he suggested the option to review the costs involved to complete the work, and noted outside expertise available.

Moved by G. Hunter (Amendment Motion)

That the Hume Motion be amended to include the following text: - Provincial grants to cover the full costs of provincially ordered hospital restructuring, and failing that ...

CARRIED

Moved by A. Loney (Amendment Motion)

That the Hume Motion be amended to include the words "and ongoing" hospital restructuring costs ...

CARRIED

Moved by P. Hume (Main Motion as amended)

That the Regional Finance and Health Departments evaluate and investigate the issue of one-time and ongoing hospital restructuring costs and the impact on the charitable sector;

And that staff prepare a report outlining potential ways to address this issue, including (but not limited to):

- **Provincial grants to cover the full costs of provincially ordered hospital restructuring, and failing that**
- **reserve funds;**
- **dedicated levy;**
- **restructuring savings;**
- **debenture; and**
- **any other options available.**

CARRIED as amended
(D. Beamish dissented)

PURCHASE OF SERVICE CONTRACT
WOODS MANUFACTURING COMPANY BRASS BAND

Mr. Guthrie Woods explained the Woods Manufacturing Company Brass Band currently had a service contract with the Region as approved by Council in June 1999. Mr. Woods stated the band had made significant movement in the United States market and created an alliance with a United States marine core band. He reviewed the previous season. A video was viewed by Committee of a performance by the Woods Manufacturing Company Brass Band.

Mr. Woods requested an extension to the purchase of service contract for the coming year and suggested the need for a more permanent arrangement. He referenced the advertising and publicity gained from the contract.

In response to a question from Councillor Cantin, Mr. Woods confirmed engagements with Australia and South Africa. Councillor Cantin explained the difficulty surrounding funding for the band was they did not qualify under the economic development or arts grants. He reviewed the value received and stated he would be attempting to find an area where funding could be accommodated.

Councillor Hill referenced her earlier comments regarding Ottawa's world presence in association with economic development. She stated the band contributed to promoting the Region, assisted with tourism, and was a worthwhile investment.

Draft Budget Minute

13 December 1999

Councillor Loney expressed concern with by passing the processes that many others valuable organizations must go through. He wondered why the request would not fall into the economic development grants program, noting the 1999 funding came from the Economic Affairs budget. He supported the request and project, however, expressed hesitation with the special circumstances around it coming forward as an exception.

Councillor van den Ham inquired about the association between the band and Woods Manufacturing Company. Mr. Woods explained the Woods Manufacturing Company no longer existed, however the band was federally charter under this name. He confirmed there was no commercial benefit and the funding for the band came from himself directly. Councillor van den Ham expressed his support, however, agreed with the concerns outlined by Councillor Loney regarding process and hoped this could be reviewed for future years.

M. Beckstead, Chief Administrative Officer, commented he was not aware of rejection of the application from the arts or economic development grants programs. He acknowledged comments from Committee members regarding the use of the appropriate process and competing on a level playing field with others. He indicated the economic development grants program had only been active for the previous few years.

Moved by R. Cantin

That the Chief Administrative Officer find a source to provide a \$10,000 purchase of service contract for the Woods Manufacturing Company Brass Band.

CARRIED

2000 DRAFT OPERATING ESTIMATES - OPERATING DEPARTMENTS

OFFICE OF THE REGIONAL CHAIR

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 7

Councillor Meilleur requested further information regarding the Regional Chair's budget, noting the one page provided in the budget book. Mr. LeBelle pointed out the reduced documentation provided for many departmental budgets was a result of the advanced time line in which they were given to complete the budget books. He stated departments were prepared to offer verbal explanation and further written information where required.

B. McGuinty, Chief of Staff, agreed to provide a detailed budget prior to Council on 22 December. He indicated the Regional Chair's budget was identical to that of 1999 and 1998.

Councillor Hunter pointed out a slight decrease in the area of compensation, however, the staffing was reduced from 8 to 7 persons. He wondered if the other employee were receiving a raise, as the reduction in the compensation was not equivalent to the reduction in full time employees. Mr. McGuinty confirmed staff did not and would not receive a raise in salary over 1999.

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Regional Chair's Office Budget, page 7, as presented.

CARRIED

OFFICE OF THE CHIEF ADMINISTRATIVE OFFICER

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 11-33

In response to a question from Councillor Cantin regarding the estimated actuals and the final budget figures, Mr. LeBelle offered the following explanation. He stated that to compare to actuals for the purpose of developing a subsequent year budget would encourage departments to spend their budget regardless, an action Finance had always guarded against. He added there was a recognition that the budget represents the base required to carry out their business. Mr. LeBelle commented in any year there would be situations where departments are not required to actually spend the entire budget.

Draft Budget Minute

13 December 1999

J. Barbeau, Director, Corporate Programs and Administration, also added the figures were completed in the fall for submission to Finance. She reported the significant change following this submission was the announcement from the Province regarding governance and the need for significant follow up and activity after that point. Mr. LeBelle agreed and stated in many cases the final estimates are different than the estimated provided in the budgets.

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Chief Administrative Office Budget, page 19, as presented.

Legislative

- Corporate Services and Economic Development Committee Operating Budget Book,
pp. 55-57

Draft Budget Minute

13 December 1999

Councillor Hume referenced the *City of Ottawa Act* which states the cost of the election for 2000 shall be included in the operating budget of the ROC. M.J. Woollam, Regional Clerk, explained the Act also stated the area municipalities shall transfer their money to the Region which will provide for the \$1.67M required. This was not indicated in the budget books due to the timing around the issue of the budget material and the issue of the legislation.

Councillor Hunter referenced page 57 and the number of FTE for the Councillors' offices. He inquired about the number of part time Assistants (separate from the full time Assistants) and wondered where they were accounted. Councillor Hunter suggested the Member Services Committee may wish to review this matter, indicating the provision in the budget may not be required if it only added up to two FTE positions, thereby, not being used by most Councillors. Ms. Woollam stated she would review the numbers and provide more information prior to the Council meeting.

Ms. Woollam confirmed there were no over expenditures in the Councillors' office budgets.

13 December 1999

Lansdowne Park

- Corporate Services and Economic Development Committee Operating Budget Book,
pages 88 - 89

Councillor Hunter stated there was not enough information in the budget to allow him to feel comfortable with the proposed break even position, noting the previous annual City of Ottawa deficit.

The Councillor referenced the exploration of revenue opportunities, including the implementation of a parking charge and increased user fees. Councillor Hunter expressed concern with the figure proposed to raise from these sources and the limited ability to consult with the public due to the advanced budget timetable. Councillor Hunter was concerned that the amount of pressure to be expected from the users of the Park would ultimately constrain their ability to actually implement the changes. He did not necessarily agree with the implementation of the parking charge and commented on some of the consequences of that option. Councillor Hunter did not believe the break even page was sustainable in the long term, and stated he would prefer more realistic and detailed information.

Councillor Cantin noted the deteriorating state of some of the halls / rooms in the facility, and inquired if this resulted in decreased revenues. N. Tunnacliffe, Planning and Development Approvals Commissioner, acknowledged this had been a problem. However, he explained funds had been allocated for this purpose and should assist with increased usage. Councillor Cantin reviewed the benefit of reoccurring and established events using the facility on an annual basis. In closing, Councillor Cantin supported the budget and reviewed the proposed and positive changes to the use and revenue for the Park.

Mr. Beckstead reminded Committee that the previous commitment stated no tax line dollars allocated to Lansdowne Park. He confirmed they were to budget to break even and if they did not in the first year, the difference would be made up in the second or third years and it would carry forward as a separate cost centre on its own. The Chief Administrative Officer stated further issues were being review, such as the parking study, and staff would be reporting back to Committee. R. Ennor, Director, Property Services Division, added the 1999 budget was \$3.8 M whereas the 2000 budget was \$3.5M, a reduction of \$300,000 thereby reducing the gap. He referenced further revenue and operating opportunities as well.

Draft Budget Minute

13 December 1999

In response to a question from Councillor Cantin regarding a policy on reduced or free rates under certain circumstances, Mr. Beckstead explained the original report on the assumption of the Park stated if there were events that Council wished to subsidize, the appropriate revenue would still go to the Park and the expense would be accounted for elsewhere.

Councillor Legendre inquired about the planned future for the management of the Park. Mr. Beckstead stated the annual budget would still come forward to Council as long as it was a Regional facility. However, he stated it was the intent to set up a separate reporting relationship and once details were finalized, a report would be brought forward to Committee.

Councillor Legendre expressed some discomfort with the long term ownership of the facility as he believed it was only to have been on a transitional basis in order to save the Park. Mr. Tunnacliffe referenced page 77 and reviewed the following goal: “a review of the management models and recommendations for long term management and operation of the Park will be completed early in the year to ensure the Region’s long term objectives for Lansdowne are met.”

Councillor Meilleur referenced the appointment of the Special Advisor on Local Governance and pending restructuring legislation. She expressed surprise with the continuation of the assumption of Lansdowne Park, when restructuring will bring the assets together in any event. Mr. Beckstead stated in the absence of a different Council direction, the assumption would continue recognizing it would only be for one year. He did not believe it was lost work and recommended the process continue.

Further to earlier comments from Councillor Legendre, Councillor Loney requested clarification around the ownership of the Park. Chair Chiarelli stated it was his understanding ownership would remain with the Region, but it may be operated through a management agreement by an arms length body, such as a non-profit corporation. The Chair expected a report would come forward in Mar/Apr to consider the management options. Councillor Legendre requested information regarding the legal restrictions around transferring ownership to be included in the report.

Speaking to the continuation of the process, Councillor Loney noted the City of Ottawa budget was prepared with the elimination of the \$1.2 M from their budget and it did represent a savings to that Corporation.

Draft Budget Minute

13 December 1999

Chair Chiarelli stated certain dynamics would unfold over the next eighteen months. He believed when the one city was introduced, it would be necessary to deal with Lansdowne Park, in addition to many other recreational facilities noting the current Departments of Recreation in the area municipalities. The Chair pointed out the current competitive environment among the facilities. He explained the new Council would have to develop a business plan on how to position the facilities collectively as a new City, including marketing and policy work.

CARRIED

HUMAN RESOURCES

- Corporate Services and Economic Development Committee Operating Budget Book, pp. 93 - 97

Councillor Hunter referenced the corporate salary budget for 2000, noting the restructuring legislation seemed to freeze activities around hiring, termination, and collective bargaining. A. Boettger, A/Human Resources Commissioner, confirmed all five of the Region's collective agreements would expiry on 31 December 2000 at which time the new one city administration would pick up negotiation for 2001 effective the first day of the new city. Mr. Boettger reported this expiry date was co-ordinated with the area municipal Human Resources Departments in order to enable most of the collective agreements to expire at the same time and not create any undue liabilities into 2001.

Councillor Hunter reviewed the activity counts outlined in the budget documents, in particular around the areas of grievances and labour relations. Mr. Boettger stated the figure for grievances represented internal and not proceeding to arbitration. He added approximately 95% of the grievances that proceed to arbitration were settled through the mediation process. Mr. Boettger referenced the inquiries on labour relations issues and employment management. He indicated a higher increase in traffic from management staff in looking to resolve issues early by speaking to the Human Resources Department and seeking advise.

In closing, Mr. Boettger explained the pending restructuring would further increase the activity in this area. He added the Region was generally one of the better employers of this size in the Province, and the grievance activity was low compared to most organizations in the 4000-5000 employee range. Mr. Boettger pointed out the Region was 95% unionized and referenced the good relationships with the union associations.

Draft Budget Minute

13 December 1999

Councillor Hunter requested a future report on labour relations within the corporation. He believed it could serve as a comparison document after the restructuring when the new corporation / city was implemented.

Draft Budget Minute

13 December 1999

Councillor van den Ham referenced the pending legislation around restructuring and the cost of approximately \$2M for the Transition Board to be covered by the Region. He inquired if that had been accounted for in the 2000 budget. Mr. LeBelle confirmed it was not included in the budget as a result of timing around the preparation of the documents and receiving the details on the legislation. The Finance Commissioner suggested Committee may wish to direct staff to prepare a recommendation to Council to be considered on 22 December. Councillor van den Ham believed it was important for Council to deal with the issue and identify the funds, as he did not support the \$2M coming from the Region Wide reserve fund.

Moved by R. van den Ham

That an amount of \$2 million be added to the corporate budget (Sundry and Remissions - CSEDC Operating Book page 133) for the provision of the Transition Team, subject to staff comments to be provided at the Council budget review meeting on 22 December 1999.

Lansdowne Park Retrofit

- Corporate Services and Economic Development Committee Capital Budget Book, Project Number 900501, additional page distributed at Committee

Chair Chiarelli explained the agreement with the City of Ottawa required the Region to undertake a number of capital improvements to the Park amounting to \$7M with an annual repayment from the City of \$675,000.

Mr. LeBelle referenced the pending restructuring and suggested the entire authority should be placed on the books for 2000, on the understanding it was recoverable from the City of Ottawa through an annual payment. He did not believe it was appropriate to have the authority brought on over a number of years.

That the Corporate Services and Economic Development Committee recommend Council approve the 2000 Lansdowne Park Capital Project Details, as presented.
